

# Forest Operations

## Degree Requirements (High School Grads)

The Forest Operations Major is divided into two main specialization options:

- Harvest Planning and Engineering – See below
- Commerce (Minor in Commerce) – See pages 5, 6 and 7

## Harvest Planning and Engineering (HP&E)

The Harvest Planning and Engineering Specialization offers courses in geotechnical engineering, forest road design and location, planning of forest operations at the stand and landscape levels, engineering and economic analysis of logging systems, and forest transportation systems. Graduates of this specialization have the unique skills that are needed to analyze, plan, and implement a wide range of silviculture, logging, and transportation systems which are key elements in forest management. Some graduates of this specialization choose to take additional courses in mathematics and applied science to obtain eligibility for registration as a professional engineer (P.Eng.) in addition to registration as a professional forester (R.P.F.) (see *list of courses for P.Eng on Page 4*). Physics 12 would be helpful for students considering this specialization.

# Minor in Commerce

Students who desire a stronger foundation in business may consider the Minor in Commerce. Upon successful completion of this minor program, the notation "Minor in Commerce" will be placed on the student's transcript.

Enrolment in this program is limited. Please see the program director. To be considered, the student must be eligible for at least third-year standing in the Forest Operations Major with a cumulative average of at least 68% in the previous two years. Completion of ECON 101 (or ECON 310) and ECON 102 (or ECON 311) is required. Meeting the stated minimum requirement does not guarantee admission into the Minor.

Students may require an additional term to complete the Minor in Commerce. The Commerce Minor is intended to be completed over two years.

# Co-op Option:

The co-operative education (co-op) option within Forest Operations is a highly competitive program which increases your chances of working in your chosen field. As a co-op student you gain up to 20 months of paid, relevant and invaluable work experience.

Co-op students will extend their degree by one year, completing eight academic terms and five work terms over a five-year period. Below is the standard Forest Operations program map for those in co-op:

\*The Field Schools are one week in duration. They are scheduled immediately before or after regular classes.

	<b>Term 1 Sept - Dec</b>	<b>Term 2 Jan - Apr</b>	<b>Summer May - Aug</b>	
<b>Year 1</b>	Basic Sciences, Economics, English, Math, Soil Science, Introduction to Forestry, Biometrics, & Computer Applications			
<b>Year 2</b>	Forest Plant Biology & Ecology Forest Measurements, Hydrology, and Operations Conservation Theory		<b>Co-op 1 (Junior)</b>	Fall Interior Field School*
<b>Year 3</b>	Silviculture, Entomology, Pathology, Fire, Wildlife/Fish Mechanics of Wood	<b>Co-op 2 (Intermediate)</b>	<b>Co-op 3 (intermediate)</b>	
<b>Year 4</b>	<b>Co-op 4 (Intermediate)</b>	Forest Economics Operations Planning & Management Forest Measurement Soil Mechanics, Forest Engineering	Spring Coastal Field School*	<b>Co-op 5 (Senior)</b>
<b>Year 5</b>	Forest Policy Forest Machinery & Engineering Business of Forest Operation Wood Properties & Manufacturing Mathematical Modeling	Sustainable Integrated Forest Management Business Management Graduating Essay		

## Good to know:

- Undergraduate students must apply to co-op in September of their second year
- You should acquire a driver's license if you do not already have one
- Work in British Columbia, across Canada and around the world
- Be supported by our Co-op Coordinators every step of the way

To learn more about the Co-op Program and how you can apply, contact the Forest Operations Co-op Coordinator: **Nazlyn Pirani, Dean's Office - FSC 2615, 604-827-5196, [nazlyn.pirani@ubc.ca](mailto:nazlyn.pirani@ubc.ca)**

# How to successfully complete first year:

1. You must follow your program closely – take the appropriate classes outlined for your degree. The most up-to-date program requirements are always listed on the UBC Calendar at [www.students.ubc.ca/calendar](http://www.students.ubc.ca/calendar) (click on 'Faculties, Colleges, and Schools' and then on 'Forestry').
2. You must pass at least 60% of the total number of credits attempted in both Terms 1 and 2 (summer classes are not included).
3. You must also obtain an average grade of at least 60% in both Terms 1 and 2, including any failed courses (summer classes are not included). If your average for Terms 1 and 2 is at least 55%, but less than 60%, you will be placed on academic probation and will be sent a letter outlining additional steps you must take in order to remain in your program. If you do not meet the criteria noted above, you will be asked to leave UBC for at least one year. Following this probationary period, you may re-apply to UBC but you must complete at least 12 credits at a college during your time away.

## Professional Designations

### Courses toward Registration as a BC Professional Forester and Professional Engineer

Students who wish to work towards membership in the **Associations of BC Forest Professionals** (ABCFP) or the **Engineers and Geoscientists BC** (EGBC) are advised to contact Forestry Student Services. The information is also available on their respective websites. There are also information sessions held throughout the academic year in the Faculty of Forestry – stay tuned for this schedule. Alternatively, you can speak to your program director.
